# Feature Release V1.6.0

---

## Release NO.

CP-CAM-00\_V1.6.0.WVUpgrade

## Release Date

August 4, 2023

## New Features

1. The CI monitor maximum support 64 ES PID.

## Resolved Issues

1. Simplify the ES PID descramble setting.
2. Resolved the issue that it doesn't show the descrambled PID on the status page.
3. Resolved the issue that module could not remove the input configuration after remove the configuration of the output module.
4. Resolved the issue that after change other module on the same slot, the service configuration on the input module would still remain.
5. Resolved the issue that configure the TS to some specific channels of baseboard output, the clear configuration for those channels would be abnormal.
6. Resolved the issue that enable the auto-scan feature, the ts doesn't recover on time.
7. Resolved the issue that the program could not handle the situation about the CA descriptors are conflict when the ECM PIDs are conflict.

## Test Results

positive

## Remaining Issues

None

# Feature Release V1.5.5

---

## Release NO.

CP-CAM-00\_V1.5.5.WVUpgrade

## Release Date

December 12, 2022

## New Features

None

## Resolved Issues

1. Resolved the issue that when the module name is with space, the license and configuration file would be exported abnormally.

## Test Results

positive

## Remaining Issues

1. The module is failed to scramble. It needs to be plugged into another decoder to decode the same signal, and then plugged it back into CP-CAM to successfully unscramble.

## Feature Release V1.5.4

---

### Release NO.

CP-CAM-00\_V1.5.4.WVUpgrade

### Release Date

March 25, 2022

### New Features

none

### Resolved Issues

1. Resolved the issue that this board couldn't display the direction of the program setting output on CMP300D.
2. Resolved the issue that use CMP baseboard IP input the signal, the output has no bitrate after descrambling the signal and multiplexing to baseboard IP output.
3. Resolved the issue that the slot number of the exported SNMP file is not the same. As a result, the status of the module cannot be read.

### Test Results

positive

### Remaining Issues

1. Environment: [CMP201 + CP-CAM-00 + program scanning]. The type of module is scramble, the module would still auto scan the channels even part of the programs couldn't be scrambling successfully.

# Feature Release V1.5.0

---

## Release NO.

CP-CAM-00\_V1.5.0.WVUpgrade

## Release Date

March 25, 2022

## New Features

1. Rebuilt the version number from V1.4.0 to V1.5.0.

## Resolved Issues

none

## Test Results

positive

## Remaining Issues

none

# Feature Release V1.4.0

---

## Release NO.

CP-CAM-00\_V1.4.0\_S10609\_F472\_W10586\_20191129.WVUpgrade

## Release Date

November 29, 2019

## New Features

1. Made it support the function of reverse proxy.

## Resolved Issues

none

## Test Results

positive

## Remaining Issues

none
