Feature Release V1.6.0

Release NO.

CR-DVBS2FTA-01_V1.6.0.WVUpgrade

Release Date

August 10, 2023

New Features

1. Newly add “delete null packet” on module IP output.
2. Modify the maximum NIT Transport stream to 96
3. Newly add import/export NIT feature.
4. Newly add the wireline, territorial, satellite transportation system descriptor.
5. Newly add NIT Network ID
6. Newly add the TOT table editing feature.
7. Newly add the total bitrate statistics on status page.
8. Newly support delete signal channel.
9. Newly add the print message for the input bitrate variation on log
10. Newly add the feature that user could bypass the channel without scanning channel.
11. Newly add the feature that user could add the other PID without scanning channel.

Resolved Issues

1. Modify the channel and SI table scanning time from 12s to 120s
2. Resolved the issue that the BISS parameters is not precise after importing configuring
3. Resolved the issue that when user is failed to export the NIT, the module could not be accessed for a while.
4. Resolved the issue that enable auto-scan feature, the output TS isn't recovered
5. Resolved the error 500 issue.

6. Resolved the issue that it won't show EMM PID when user scan single channel
7. Resolved the tuner unlocked issue.
8. Resolved the issue that the channel scanned progress bar could not match to the real scanning time.
9. Resolved the issue that enable "delete null packet" selection, the total bitrate and effective bitrate would be the same on the status.

Test Results

positive

Remaining Issues

None

Feature Release V1.5.6

Release NO.

CR-DVBS2FTA-01_V1.5.6.WVUpgrade

Release Date

January 16, 2023

New Features

None

Resolved Issues

1. Changed the ESPID name display style in the table in the program configuration screen.

Test Results

positive

Remaining Issues

1. When set the Pkt length to 1 or 2 and module IP output bitrate is over 120M, the actual IP output would have serious mosaic.

Feature Release V1.5.0

Release NO.

CR-DVBS2FTA-01_V1.5.0.WVUpgrade

Release Date

March 25, 2022

New Features

1. Rebuilt the version number from V1.4.200 to V1.5.0.

Resolved Issues

none

Test Results

positive

Remaining Issues

none

Feature Release V1.4.200

Release NO.

CR-DVBS2FTA-01_V1.4.200-beta.WVUpgrade

Release Date

March 21, 2022

New Features

none.

Resolved Issues
